## You Want It, You Got It

You want it, We got it This is the place Where everyone can belong You want it, we got it Kicking up a riot Won't you all sing along

Can't tell you where I was going so tired It was showing like the wind I'm blowing Every town man I'm know in

You want it, We got it This is the place Where everyone can belong You want it, we got it Kicking up a riot Won't you all sing along

Some live a life of indecision Strung out in the petty schisms I heard GBH I made a decision Punk Rock is my religion

You want it, We got it This is the place Where everyone can belong You want it, we got it Kicking up a riot Won't you all sing along

I sit back and I think its funny You we're so worried about the money Cloudy days are looking sunny So why don't you come and stick with me honey

You want it, We got it This is the place Where everyone can belong You want it, we got it Kicking up a riot Won't you all sing along

To all our friends BY this I swear

You want it, We got it This is the place Where everyone can belong You want it, we got it Kicking up a riot Rancid

Won't you all sing along
