

# Live Without You

Raphael Saadiq

It's me and you for life  
You know I'm loving it, girl  
I'm holding on, baby  
Where you wanna do this at?  
In the church? Or do you wanna go to Vegas?  
No, we gotta do this at the church, hey hey hey...

Girl, I never wanna live without you  
I never wanna breathe without you  
Kiss without you, love without your love  
Girl, don't ever wanna be without you  
I never wanna live without you, breathe without you  
I need you in my world  
Listen

Come have a glass of wine with me  
I think you are the gorgeous thing I've ever seen  
I'm looking at your face  
There's no way that I could ever walk away from you  
So tell me here right now: is someone holding it down?  
'Cause I would love to put it down on you a few times  
I think we had enough red wine  
Something's telling me that you wanna be mine, girl  
Is it true?

Girl, I never wanna live without you  
I never wanna breathe without you  
Kiss without you, love without your love  
Girl, don't ever wanna be without you  
I never wanna live without you, breathe without you  
I need you in my world

Our night has now turned into day  
Is there anything that you and I want to say to each other  
We both know it was good  
How do you wanna walk away to see if you want me the very next day  
I'm never checking out  
But you'll go home, change your clothes, or I'll have some sent up to you  
Ooh, should I see the plan?  
You got me and all we need to see is the preacher

Girl, I never wanna live without you  
I never wanna breathe without you  
Kiss without you, love without your love  
Girl, don't ever wanna be without you  
I never wanna live without you, breathe without you  
I need you in my world  
Girl, I never wanna live without you  
I never wanna breathe without you  
Kiss without you, love without your love  
Girl, don't ever wanna be without you  
I never wanna live without you, breathe without you  
I need you in my world

Need you in my world, yeah  
I love you, baby; I love you this much  
I want you, baby, that I can feel your touch

Come hold me baby, take your clothes off with me  
I wanna put you on that Saadiq-stasy  
I wanna put you in my mind, I wanna put you in my heart  
I wanna keep you 'round me, yeah, oh yeah  
I love it when you do me, baby, when you do me, baby baby baby  
Oh yeah, clap your hands, baby  
Clap your hands, baby; clap your hands, baby  
If you wanna love me, baby  
What you wanna say now, baby?  
I need you in my world, baby  
Yes I do, baby  
Good night, baby – peace
