## Black & white

## Rawside

```
See your friends fighting against their health
see mankind fighting against itself
see nations marching into wars
see children dying under a car
see the bloods fighting against the crips
see the whites fighting against the blacks
see religions fighting against the sin
but who realize, no-one wins
See the blacks
See the whites
See your friends
See them die
Believe your lie
let the victim die
support your lie
like them you will die
```
