

Together

Rawside

I was born 20 years ago and I live in South Africa
My skin is black, my teeth are white
So people tell me, that ain't right
Hear them telling us, go back to virgin forest
Racists now hear my voice, this land is not yours

Day by day - I feel the white power
Day by day - we are suppressed
Day by day - I hope's the last hour
Day by day - a new oppression

In the streets you slap me down
I see the people passing by
You spit the hate into my face
That's the way of K.K.K.
But don't forget the hate you give
One day will come back to you
And don't forget, the blacks are strong
Very strong and proud, too

Fight you down - with the weapons of the street
Fight you down - with your hate

Together - fight back - together - strike back

We are the ones to govern - together is our way
We have the power - believe in what we say

Now we are the children, the children of this land
