

Stay the Night

Ray Parker Jr.

From the time we said hello
I've wanted you to know
That I've got the urgent of curiosity

To find out how sweet you can be
Now I don't like to push
It's not cool that way
But somehow I'd like to say

Feel so right
I wish that you would stay the night
Don't be shy
Give in to me and stay the night

Though I haven't known you long
The feeling is so strong, baby (mmm)
Makes me wonder if it's possible that you
Feel the same way that I do (You know you want to baby)
But honey, to rush is the last thing I mean to do
But I can't help of being in the mood

Feel so right
Girl, you know you wanna stay the night

Now you know that I'll make it good to you baby
If you'll just stay the night
All night
(Don't be shy, stay the night)

Stay
All night long with me
Come on baby
(Stay the night, all night)

I'll make it good to you baby
If you'll just stay the night
That's a promise girl
(Don't be shy)
No, No, give in to me and stay the night
All night

Let's go for it over here, over there
Every which way and when tonight
Any place you like
(Feel so right) Cause I feel so right
I wish that you would stay the night
Come on baby

Oooh
