

Last Train

Red Lorry Yellow Lorry

Desert the streets they hold no wealth
I looked around at no one else
There's nothing left for you and me
And it's not hard for me to see
We're on the last train, we're on the last train
Last train, we're on the last train.
There's someone screaming to get out
But no-one really hears them shout
There's no escape just one long ride
So close the doors and stay inside
We're on the last train, we're on the last train
Last train, we're on the last train
