

# She Said It Was Destiny

Richard Thompson

Is this the togetherness she meant - so rosy  
I thought we'd share a continent - so cosy  
I thought love's passions really  
Would be more touchy-feely

She said it was Destiny  
She said it was written somewhere  
But if it was destiny  
Why am I over here and she's over there  
She said it was in the stars  
Something that just had to be  
But Venus aligned with Mars  
Always really takes it out of me

O I'm not proud of my deceit - you know that  
To come so near and then retreat - you know that  
One beat before I fell  
Somewhere I heard a bell - ring, ring

She said it was Destiny  
She said it was written somewhere  
But if it was destiny  
Why am I over here and she's over there

There's clouds across my crystal ball - too misty  
Was I too quick to give it all - when she kissed me  
She's thrown a net on me  
Razor wire geometry

She said it was Destiny  
She said it was written somewhere  
But if it was destiny  
Why am I over here and she's over there  
She said it was in the stars  
Something that just had to be  
But Venus aligned with Mars  
Always really takes it out of me
