

Don't Stop Gypsy

Ricky Skaggs

Don't stop gypsy
Don't you give up your ways and settle down you're still young
There's still a lot of life that hasn't been seen
Take the world as it comes and get your rest in between
Chance will never come around again.

Goodtime highway
With the wind in your hair as you're ridin' to wherever you please
You can take your guitar and play your songs to the stars
While they twinkle above your head
And who cares what tomorrow brings.

Don't you tangle with romance cause it'll leave you alone
And crying in the end
The life that you lead must be simple and free
It's not your fault my friend
Don't stop gypsy.

Don't stop gypsy
Don't you give up your ways and settle down you're still young
There's still a lot of life that hasn't been seen
Take the world as it comes and get your rest in between
Chance will never come around again...
