

I Am With You

Rotersand

I am with you from the day
You saw the light and took your mother's breath away
I am with you when you fade
When your soldier's laying down his blunted blade

Once you'll stay with me
I will set you free
Forever free from all your worries and your vanity
There's no need to fear
I will hold you dear
In my arms you'll close your eyes for all eternity

I am with you when you laugh
With sudden joy that makes you praise the gods above
I am with you when you cry
When all you ask is why and there is no reply
