

So cold in the morning
When you're out of ketamine
Lying on the pavement
The sun can't warm you up

So cold in the morning
When you lost your only friend
Somewhere in the club
The sun can't warm you up
The sun can't warm you up

Cold in the morning, hot at night
Watch my heart stop under the strobe-lights
Cold in the morning, hot at night
Watch my heart stop under the strobe-lights

Cold in the morning
When you're walking home
In yesterday's clothes
The sun can't warm you up
The sun can't tell a lie
The sun can't keep you clean
Hard as you try
