

Sister Rosetta Goes Before Us

Sam Phillips

Strange things are happening everyday
I hear the music up above my head
Oh the side of my heart has left me again
I hear music up above

Secrets are written in the sky
It looks like I've lost the love I've never found
Tho the sound of hope has left me again
I hear music up above

Standing in the my broken heart all night long
Dark and silky like a friend where love wore off
Looking for the land that's hidden in the cross
Find it's lost

I know, I love you too much
I'll go on alone, to get through

I hear Rosetta singing in the night
Echoes of light that shine like stars after they're gone
And tonight, she's my guide as I go on alone
With the music above
