## You Can't Hide

## **Sanctus Real**

When you're feeling all alone and you've got no friends on the phone When you've reached your all time low, He'll be around

In your car, in the starts, He's everywhere you are He's alive and He'll always find you When your down He's around and He knows...

Of all the places you can go, you will never be alone Of all the places you could find, there is nowhere you can hide

When you think you've escaped He's right beside you When you sleep, when you wake, in the midst of your heartbreaks He is there, and he knows

Make no mistake, He'll be around Make no mistake, He'll be around
