

When I Dream

Sarah Connor

Day by day I'm lost for words to say
I try to speak but the words won't come
Where's the love keep me save from harm
We could take the wings of love and fly
You got me changin' in so many ways
Beyond this world, no more lonely days
All the love that we share when we met
Sweet ecstasy, baby you and me
Dream with me

Ladida ladia hoohoo ladida
Lalaliladida ladida hoohoo ladida
When I dream
Ladida ladia hoohoo ladida
Lalaliladida ladida hoohoo ladida

Close my eyes I'm on my own again
Baby missing every single friend
Fill my heart and take my hand
Dreams upon an ocean swept away
My mind rises 'til the sun goes down
A journey of love carry my daydream home
Don't close your eyes and look into mine
Believe in me, a dream so heavenly
Dream with me

Dream with me
All the love that we share when we met
Sweet ecstasy, baby you and me

When I dream, I dream in color
I need a real love, not just a lover
No, no, no
