

# Big Picture

Sawyer Brown

It was my junior year  
I believe it was in the fall  
The first time I decided that I knew it all  
I was moving right along  
Thinkin' that I could do no wrong  
I remember hearin' someone say  
They told me

It's a big picture  
Little man  
It takes a while to understand  
You don't always know where you're gonna fit in

When you get through winning the human race  
Somebody's there to take your place  
So live and love the best you can and remember  
The big picture

I was twenty-one I remember back in the spring  
The first time I could tell I didn't know a thing  
The girl cut me to the bone  
I was lookin' to wind up all alone  
I remember hearing somebody say  
They told me

It's a big picture  
Little man  
It takes a while to understand  
You don't always know where you're gonna fit in  
When you fall down running the human race  
Somebody's there to save your face  
So live and love the best you can and remember  
The big picture

It cuts you down to size  
And sometimes I need it  
Right before your eyes  
I can finally see

It's a big picture  
Little man  
It takes a while to understand  
You don't always know where you're gonna fit in  
You just keep on running the human race  
Follow your heart and find your place  
So live and love the best you can and remember  
Oh live and love the best you can and remember  
The big picture  
It's a big picture
