

Sharin' The Moonshine

Sawyer Brown

There ain't nothin' that'll rattle your chain
Like the top laid back on a Chevrolet
And the things the midnight makes you say
When you fall in love

And the sundown brings a whole new world
With good time boys and late night girls
It takes your breath and starts to swirl
Under stars above

So, let's share in the moonshine
Yeah, we'll share in the moonshine
Yeah, we'll share in the moonshine
On a hot summer night

When the stars come out and start to play
The magic melts the blue away
And at the end of every day
There's a night-time jubilee

And for her lifetime lover, you can't miss
When it starts in the evenin' with a gentle kiss
And old man Cupid can't resist
It's a twilight mystery

So let's share in the moonshine
Yeah, we'll share in the moonshine
Yeah, we'll share in the moonshine
On a hot summer night

Oh, when the wind is still
And the stars are over here
And we'll cruise till it's right
On a hot summer night

So let's share in the moonshine
Yeah, we'll share in the moonshine
We'll share in the moonshine
On a hot summer night

On a hot summer night
On a hot summer night
On a hot summer night
On a hot summer night
