

## King & Queen

### Secret Service

I was king and you - my queen  
We ruled the world had the wildest dreams  
And I read our future in the stars  
We skipped school like everyone  
And we made love in the morning sun  
Since then we've travelled oh so far

I stand and gaze at the old oak tree  
Where I carved out "Susie loves me"  
You said:  
Let's stay and meet the morning  
Stay and greet the light  
Now you miss the sunrise  
You praise the night

I was king and you - my queen  
We ruled the world happy wild this means  
And I read our future in the stars  
We skipped school like everyone  
And we made love in the morning sun  
Since then we've travelled not so far  
Tomorrow came as a big surprise  
One day is born, another dies  
You said:  
We only live one lifetime  
We only get one try  
Now I can see the sorrow in your eyes, in your eyes

I was king and you - my queen  
We ruled the world happy wild this means  
And I read our future in the stars
