

# Under The Milky Way

Seven Nations

Sometimes when this place gets kind of empty  
The sound of the gulf fills with a light  
I think about the hopeless fascination  
Under the Milky Way tonight

Lower the curtain down in Memphis  
Lower the curtain down all right  
We took our time, to find the concertation  
Under the milky way tonight

Wish I knew what you were looking for  
Might have known what you would find  
That is something quite peculiar  
Something that shimmers green and white

Did you hear, despite our fascination  
Under the milky way tonight

Wish I knew what you were looking for  
Might have known what you would find  
Wish I knew what you were looking for  
Might have known what you would find

Yeah  
I know something quite peculiar  
Something that shimmers green and white  
But did you hear, despite our fascination?  
Under the milky way tonight

Wish I knew what you were looking for  
Might have known what you would find  
Wish I knew what you were looking for  
Might have known what you would find

I know something quite peculiar  
Something that shimmers green and white  
But did you hear? Despite our fascination?  
Under the milky way tonight
