

# Light It Up

## Seventh Day Slumber

We had it all, somehow we lost it  
We built this castle but now we're locked inside  
I gave it all, you held me hostage  
I couldn't leave you even though I tried

Arms wide open  
You won't be the death of me

Light it up, light it up  
Throw me inside the fire  
Infected with your toxin  
Tear it out, tear it out  
All the little things you say  
Infested with your madness

This is the end of your games  
The end of your reign  
I'm never going back again  
This is the end of your games  
The end of your reign  
I'm never going back again

I saw the signs of my addiction  
I tried to fight but you're the poison that I crave  
Now it's time, I've gotta kick this  
A poison love that could lead me to my grave

Arms wide open  
You won't be the death of me

Light it up, light it up  
Throw me inside the fire  
Infected with your toxin  
Tear it out, tear it out  
All the little things you say  
Infested with your madness

This is the end of your games  
The end of your reign  
I'm never going back again  
This is the end of your games  
The end of your reign  
I'm never going back again

Light it up, light it up  
Light it up, light it up  
Light it up, light it up  
Light it up, light it up

Light it up, light it up  
Throw me inside the fire  
Infected with your toxin  
Tear it out, tear it out  
All the little things you say  
Infested with your madness

This is the end of your games

The end of your reign  
I'm never going back again  
This is the end of your games  
The end of your reign  
I'm never going back again
