

# Call My Friends

Shawn Mendes

Right now I'm alone inside the airport  
And you're all at a bar in our hometown  
Feels like we been living different lives

The music's loud and everybody's dancing  
How many nights I've missed, yeah I've lost count  
Haven't seen your faces in a while

I should call my friends

I should call my friends and go get high  
I need a vacation from my mind  
I wanna go, nobody knows me better than them  
Wanna feel something again  
I should call my friends

I don't wanna miss another birthday  
Feels like it's been forever since nineteen  
I just wanna be right where you are

I miss how it was when we wished we were older  
Feeling so far when I wanna be closer  
I should call my friends

I should call my friends and go get high  
I need a vacation from my mind  
I wanna go, nobody knows me better than them  
Wanna feel something again  
I should call my friends

Ooh, I know you gotta make some sacrifices  
Ooh, don't wanna be alone for one more night  
Ooh, I know you gotta make some sacrifices  
I should call my friends

I should call my friends  
I should call my friends and go get high  
I need a vacation from my mind  
I wanna go, nobody knows me better than them  
Wanna feel something again  
I should call my friends
