

## A Better Place

Shifty

I wish we could live forever but everyone dies  
Everyone laughs and everyone cries  
I'd be mad but I'm glad you apart of my life  
Make sure you stop by my dreams when I'm sleepin at night  
Now a piece of my heart is lookin down from the sky  
Like an angel on my shoulder helpin me to get by  
And all the words that you told me were words of the wise  
To navigate my path through the drama and lies

I won't forget you  
and I'll keep loving you  
but it's hard to live my life when you are not around  
I'll try to make it through  
I know you want me to  
But it's hard to think of you without me breakin down

I know you're in a better place  
I know you finally feel your pain  
I miss you my best friend  
I'll never find someone like you again

I try to stay optomistic but it hurts so bad  
For me to lose a best friend that I'll probably ever have  
Now everyday when I wake I see how precious life is  
Maybe someday you'll come back as one of my kids  
It's crazy things change how hard life can be  
I remember we were young everything seemed so easy  
I had you by my side and i thought you'd never leave me  
And even though you're gone you still never will believe me

we're born to live and we live to die  
walk on the ground as though through the sky and  
we're born to live and we don't ask why  
transcend and reside where stone angels cry  
we're born to live and we live to die  
walk on the ground as though through the sky and  
we're born to live and we don't ask why  
transcend and reside where stone angels cry
