

The Human Radio

Shinedown

I gotta four-letter word for "I don't care"
A whole lotta drive to get me there
I've seen a whole lotta wrong, to say the least
Spent a whole lotta time staring down the beast

Keep moving subject, matter around
Keep your eye on the prize and your feet on the ground
Keep moving subject, matter around
Keep your eye on the prize and your feet on the ground
Keep your eye on the prize and your feet on the ground
Keep your eye on the prize and your feet on the ground

I'm reaching out to the human radio
To get a jump on 'em, a witch hunt on 'em
Get some money, throw the tantrum
The human radio is playing your anthem

The human radio is playing your anthem
The human radio is playing your anthem
The human radio is

I've got a handful of friends that can't be bought
If you tell 'em you're the king, you're probably not
Got a brand new approach, and I ain't done
I'm the master of machines, a bullet on the run

Keep moving subject, matter around
Keep your eye on the prize and your feet on the ground
Keep moving subject, matter around
Keep your eye on the prize and your feet on the ground
Keep your eye on the prize and your feet on the ground

I'm reaching out to the human radio
To get a jump on 'em, a witch hunt on 'em
Get some money, throw the tantrum
The human radio is playing your anthem

We march, we fight, we live
We scream, we die, we give
We want the world to know
We are the human radio
We march, we fight, we live
We scream, we die, we give
We want the world to know
We are the human radio

The human radio is playing your anthem
The human radio is
