

# Take It To Heart

Sia

People are talking, well that's nothing new  
And some things will never change  
Stories are turning away from the truth  
But people will stay the same

It's only natural that we go on  
To meet with the days that will come  
It's only natural that we all carried forward  
So step on, go on  
Get rising like the morning sun

There's no need to take it to heart  
There's no need to take it to heart  
Only the truth can tear you apart  
There's no need to take it to heart

People are talking, well that's nothing new  
And some things will never change  
Stories are turning away from the truth  
But people will stay the same

Well stand tall and lock the same  
And don't let it get you down  
Make them all feel hurted  
But for you I will stand my ground

There's no need to take it to heart  
There's no need to take it to heart  
Only the truth can tear you apart  
There's no need to take it to heart

There's no need to take it to heart  
There's no need to take it to heart  
Only the truth can tear you apart  
There's no need to take it to heart

People are talking, well that's nothing new  
And some things will never change  
Stories are turning away from the truth  
But people will stay the same
