

Rainbow

Simon Curtis

I arrived in a world that made it clear that it didn't want me
Who would want me?
I cried and cried
And tried to find that someone else
Someone who would love me
But who would love me?

And you, you said that you do
So I, I said that I believe you
I believe you

Cause I'm a rainbow
Golden rainbow
I shine with all the colors of the light
I'm a rainbow
Golden rainbow
I keep shining on even if I die

Every day the color break a little more
How much more can you take
What will it take?
You shine and shine about the pain
But they don't think that what you feel is valid
They don't think your valid

You, you said that you do
So I, I said that I believe you
I believe you

Cause you're a rainbow
Golden rainbow
You shine with all the colors of the light
You're a rainbow
Golden rainbow
You keep shining on even if you die

Cause we're a rainbow
Golden rainbow
We shine with all the colors of the light
We're a rainbow
Golden rainbow
We keep shining on even if we die
