Heart Of Darkness

I know she's trouble She means heartbreak A demon works inside my soul Do you hear the white wolf howls His songs from the hills I still feel the green fields talking Still see your smile in my dreams How we're strutting down through grafton When you were with me I disappeared without a trace No time, no last embrace I spread my wings A king lost his crown I just see your face When will I meet you again When the sun goes down Where all the warning's unheard My heart of darkness I've lost my way in deepest sadness Sometimes Heaven, my soul's in Hell No rescue for a bleeding heart Well, I'm walking through flames I've disappeared without a trace No time, no last embrace I spread my wings A king lost his crown I just see your face When will I meet you again When the sun goes down Where all the warning's unheard In my heart of darkness I've disappeared without a trace No time, no last embrace I spread my wings A king lost his crown I just see your face When will I meet you again When the sun goes down Where all the warning's unheard In my heart of darkness
