

# Incarnation

Snapcase

Incarnation, bring it to life  
Bring it to life  
Embody the soul  
The soul, the spirit, the essence of life  
Life now absent in our consciousness  
In this world, death just exists

I know that we can live today  
But tomorrow's more important  
The future looks  
Despondent  
Don't mean it's hopeless  
Carpe diem is great, with focus in duration  
It's time to live again, incarnation

Associate the masses  
In a world that's worth existence  
Endure the pain, universalize the message  
We've got to kill the fear that halts us in relations  
It's time to live again, incarnation

It's time to live  
In a world worth living  
A sense of hope  
A sense of feeling  
Recognize death, life is celebration  
Start today, incarnation
