

Hearts And Minds

Son Volt

We tried to guard but stayed through life
Others were trying but all is true
Shifting phase left us to realize
There's nothing more that we can do
'Cause it can't go wrong, we can't go right
Always a common thread between us

Though our hearts and minds don't waver
Waiting for love
That sound of danger

Circumstance, left to chance
As we move around safaris did burn
Tears gone down, so we wait around
Waiting for two to run
Making our days, living this way
So much to gain, so much to lose

It's not to belong but it's the center of the truth

It's not to belong but it's the center of the truth
