

# Come with Us

Sophie Ellis-Bextor

There's no need to be lonely (lonely, lonely)  
I know where you belong, yeah, follow me  
You only have to find me (find me, find me)  
No matter who you are or what you've seen

You're a bird in a cage, cursing the day  
Insulting the morning  
But don't be afraid, we're coming your way  
Wait for the calling

Come with us  
If you give us all your money  
We'll give you your dreams  
It's all soft focus  
You'll never want to turn away  
Once you release control  
You'll be lost in your fantasy  
'til your soul is lost  
You'll be longing to run  
Longing to come with us

Find out what you can be (can be, can be)  
I know that you'll surrender, fate unknown  
Welcome to the family (family, family)  
Open up the door, make yourself at home

Sign away your life to us  
And then throw yourself to the falling  
You don't need to be afraid  
Come on, this is the calling

Come with us  
In a hazy frame of mind  
You'll believe this stuff  
It's all soft focus  
You'll never want to turn away  
Under electric stars  
You'll be living your fantasy  
And from dawn to dusk  
You'll be longing to run  
Longing to come with us

Oooh Oooh Aiyah  
Oooh Oohh Oooh (x3)

Oooh Oohh Oooh  
Oooh Oohh Oooh  
Oooh

Come with us  
If you give us all your money  
We'll give you your dreams  
And from dawn to dusk  
Come away with me  
Come away with me

Come on, come with us

In a hazy frame of mind  
You'll believe this stuff  
It's all soft focus  
And you'll never want to turn away  
Under electric stars  
You'll be lost in a fantasy  
'til your soul is lost  
You'll be longing to run  
Longing to come with us
