Take Me Home

Sophie Ellis-Bextor

Take me home, take me home I know another place to be Take me home, take me home You deserve a girl like me Come on I know somewhere You can unwind We can just disappear Now's the time Take me home, take me home Only fair I get my way Take me home, take me home Oh it's going to happen anyway I know what's good for you Don't pass me by I will look after you You'll be fine I'm in heaven I'll show you heaven it's so much heaven let's make a move lets leave this world behind I know you approve by the look in your eyes I'm in heaven I'll show you heaven It's so much heaven take me home take me home I will show you where to walk take me home take me home baby let the people talk we'll get away from here I'm reading your mind We can just disappear now's the time I'm in heaven, I'll show you heaven take me home Oh, take me home Oh, take me home In this moment one night with you all alone with nothing to loose let's make a move let's leave this world behind I know you approve by the look in your eyes I'm in heaven I'll show you heaven it's so much heaven Take me home, take me home Now's the time to follow me take me home come and live what ought to be take me home take me home
