

The new millennium is here  
The smell of napalm and fear  
All this confusion and mass hysteria  
Welcome all to the new frontier

This fucking hate gets bigger and bigger  
Consume ourselves in nuclear fear  
And let me tell you that's the real enemy  
How can you kill what you cannot see

I am Mars the God of War  
You bow to me like you did before  
I am Mars the God of War  
You bow to me like you did before

Gas masks and AK-47's  
Now you won't see the gates of heaven  
Blood fire destroying weather  
To blow you away, blow you away forever

Ashes to ashes, dust to dust  
Chemical warfare and the bloodlust  
Sign of Mars in a time to come  
Mankind has finally done

I am Mars the God of War  
You bow to me like you did before  
I am Mars the God of War  
You bow to me like you did before
