

# I've Never Been High

Sparks

Thrill rides and places, wide-open spaces  
Played in a band, such harmless novelties  
Where's the forgetting, where's the regretting  
Of lurid acts that never came to be

I've never been high, never been high, never been high  
I've never been high, never been high, never been high

If I could buy it, maybe I'd try it  
But my connections aren't what they once were  
Paint me a picture, read me some scripture  
Maybe I should've stuck it out with her

I've never been high, never been high, never been high  
I've never been high, never been high, never been high  
I've never been high. I've never been high  
I've never been high. I've never been high

I've celebrated, birthdays and waited  
Waited and waited, tomorrow's just a tease  
Then I'll be something, then I'll be something  
Look there's a camera, smile and say cheese

I've never been high, never been high, never been high  
I've never been high, never been high, never been high
