Skinnyman

My little girl

Where are you? My fucked up world Destroyed you Day after day Day after day I get it now I just go on without you Twisted inside Six miles high I rehearse how to Say goodbye to you Skinnyman Turned into a monster I'm a motherfucker Wrap it up tight Emotions are distorted It's no surprise Nothing alive All hope has been aborted Day after day Day after day I get it now I just go on without you Twisted inside Six miles high I rehearse how to Say goodbye to you Skinnyman Turned into a monster I'm a motherfucker Inside i'm dead All used up God damn i miss her As my skin turns yellow I forget this hell As the skies are bruised And the rain comes down As my face turns pale Try to deal with these thoughts At the end of it all I still miss you
