

Earth and Sky

Steel Prophet

Sometime, when I look up at the sky
The night sky, night sky so vast
I wish, I wish upon a star
Your star, it burns so bright to me

O earth and sky, I wish upon your star
Your star's still there
You've gone away, it seems eternally
Your star's still there, it burns inside of me

Long ago, you broke the chains
You traveled on, you sailed the stars
I was left behind, the tears they burned in me
I long to be joined again

My time here, seems like empty years
Waiting to see you again
I believe, Oh I do believe
Our circle will start again
