

Enter the Night

Steve Hackett

Well if you need to why don't you call on me
That's what I'm made for I'll be around
Through your window are you ready to go
Neverland fires that glow
Under sail we're lovers in flight

Enter the night

Spellbound a bridge to the stars
Rainbow road nearer by far
Bright flames burn through the days

And enter the night

Lift by the lanterns of love
Held fast you'll never grow up
Your hair like coal black clouds
On the tambourine moan above

Well if you need me why don't you call on me
Sound a thousand violins on a sweet summer night

Slumbers chain
The colour of gold
Bound to your dreams
Let them unfold
Free from the Earth
When lovers cry

Enter the night
