

We Fly

Steve Perry

Just another lonely town in the dead of night
The neon streets did cry, reflectin' our lies
Just another lonely room written in a song
A time for you and I, cherished, not gone

You were the reason, love was our season
All in another place, in another time
We were together, drawn to each other
All from another place, in another time
We fly

Just another memory fadin' way too soon
It was a time for you and I, we thought we'd never lose
Just another lonely town, the faces never change
With you I had it all, together in the rain

You were the reason, love was our season
All from another place, in another time
We fly

You were the reason, love was our season
All in another place, from another time
We were together, drawn to each other
All from another place, in another time
We fly
