

# Let It Go

Stooshe

[Stooshe]

Give me your time  
And I'll give you that place  
Something 'bout you, I can look at all day  
I don't know why but you're fascinating me  
Just me patient, don't wear me down  
So let me do it my way, my way  
We can talk, or we can act it out  
But I got nothing to say, to say

Live for the moment, right now  
We're killing this energy, just die down  
So let's get together and we'll find out  
That it could be love or it don't have to be love  
Let it go, let it go, let it go  
Let it go, let it go, let it go

Nobody knows and I like it that way  
The way that you roll got me feeling all day  
I don't know why but you fascinate me  
No more patience, I want it now  
So let me do it my way, my way  
No more talk so I'll just act it out  
When I got nothing to say, to say

Live for the moment, right now

We're killing this energy, just die down  
So let's get together and we'll find out  
That it could be love or it don't have to be love

Living the moment, live it out now  
Don't get the energy, you got but now  
Took one month for it, and you will find out  
It could be love, it could be love

Live for the moment, right now  
We're killing this energy, just die down  
So let's get together and we'll find out  
That it could be love or it don't have to be love  
Let it go, let it go, let it go  
Let it go, let it go, let it go

Live for the moment, right now  
We're killing this energy, just die down  
So let's get together and we'll find out  
That it could be love or it don't have to be love  
Let it go, let it go, let it go  
Let it go, let it go, let it go
