

I Guess I Remembered It Wrong

Superchunk

I remember flying
Straight over the top
When the car it hits the curb
How could we have stopped?

Passed right over, went around
Passed right over, went around
Candle showed up into my eye
Up from the ground

I know there is no way
It could have happened that way
There is no way it could've
Happened any other way

I guess I remembered it wrong
I guess I remembered it wrong
I think that my memory's strong but
Whatever you say

I remember digging up the yard
I remember carrying you from the car
And I stuffed the valuables into the seat
Everything was brighter than it seemed

I know there is no way
It could have happened that way
There is no way it could've
Happened any other way

I guess I remembered it wrong
I guess I remembered it wrong
I think that my memory's strong but
Whatever you say

It's all coming back to me now
It's all coming back to me now
It's all coming back to me now
It's all coming back to me now

I guess I remembered it wrong
I guess I remembered it wrong
I think that my memory's strong but
Whatever you say

It's all coming back to me now
It's all coming back to you now
