

Let the Stars Shine

Swing Out Sister

Nothing's ever going to be the same
If we have to start all over
If we had the chance to do it again
Could we ever get much closer?
You had a dream and let it go
You'll never live without it
All you could have been is fading away
Now there's nothing you can do

The stars don't shine like they used to
Into the night...
Gone are the times when I knew you so well
Let the stars shine...
Light up my life
Wake up the sky
Free as the air
Pure as the night

Only you can make me feel this way
We could lose our minds together
Further than a thousand light years away
Love like this could last forever...

The stars they don't shine like they used to
Into the night...
Gone are the times when I knew you so well
Let the stars shine...
Light up my life
Wake up the sky
Free as the air
Pure as the night
Nothing's gonna be the same
If we had to start all over
If we had the chance to do it again
Why don't you tell me?
