

## Near You

Teenage Fanclub

I should get out of this seat  
feel the world beneath my feet  
strive to see more of the sun  
try to change what I've become

Move on up through this down  
take this luck and turn it around

I get near you but I never seem to reach you

Somewhere tonight the stars still shine  
somehow I've got to re-align  
fuelled by the promise of the sun  
pulled by the charm this night has spun

Move on up through this down  
take this luck and turn it around

I get near you but I never seem to reach you
