...and I Need To Be With Someone Tonight

Terence Trent D'Arby

Shine on your light Lead me to your home

Lower your sights Put away your comb

Though black babies are starving And cows fed for the carving

All I know is I'm lonely And I need to be with someone tonight

Lift up your chin Let me see your eyes

Words are not my yen My tongue is often tied

Though apartheid's a greater issue I long to hear "I miss you"

All I know is I'm lonely And I need to be with someone tonight

'Till men stop being intimidated By women who have made it

All I know is I'm lonely And I need to be with someone tonight
