

The Game

Tesla

World's gone mad
Hey the world's on fire
Food's too dear and your gas is higher
Got to eat, and you've got to breathe
Got no money, well, it's time to leave

Dow Jones crashes, the cats get rich
See them laughing

It's a game (big game)
It's just a game (a big game)

Profit's in hey, what's going on?
All this time, it's the same old song
If you've got dough, they'll lend you more
When you're broke, you get shown the door
They'll take your home and they'll take your car
Make you live in your mom's backyard

The rich get rich, then get rich some more
Pretty soon, they'll be all at war

It's a game (big game)
It's just a game (a big game)
So who's to blame?
It's just a game

Playin games with people's lives
Who struggle hard just to survive
The world is goin' up in flames
it's just a game
