

Time of My Life

The Afters

Tonight I'm having the time
I'm having the time of my life
My life

Above the diamonds in the sky
Below my feet is gold and I'm
Never gonna leave, never gonna leave this place
Never wanna leave this place
Like a scene from a different life
Like a dream that we'll never die
Never wanna leave, never wanna leave this place
Never gonna leave this place

Tonight I'm having the time
I'm having the time of my life
My life
Tonight I'm having the time
I'm having the time of my life
My life

Come alive in this atmosphere
You can be who you are in here
Never gonna leave, never gonna leave this place
Never wanna leave this place
We don't ever have to leave this town
We don't ever have to come back down
Never wanna leave, never wanna leave this place
Never gonna leave this place

Tonight I'm having the time
I'm having the time of my life
My life
Tonight I'm having the time
I'm having the time of my life
My life

Better be ready when the sun comes down
When the sun comes down, when the sun comes down
Better be ready when the stars come out
When the stars come out, when the stars come out
Better be ready when the sun comes down
When the sun comes down, when the sun comes down
Better be ready when the stars come out
When the stars come down

Tonight I'm having the time
I'm having the time of my life
My life
Tonight I'm having the time
I'm having the time of my life
My life

Tonight I'm having the time
I'm having the time of my life
My life
Tonight I'm having the time
I'm having the time of my life

My life

Better be ready when the sun comes down
When the sun comes down, when the sun comes down
Better be ready when the stars come out
When the stars come out, when the stars come out
Better be ready when the sun comes down
When the sun comes down, when the sun comes down
Better be ready when the stars come out
I'm having the time of my life
