

I Mostly Copy Other People

The Almost

So this is the time when
You be what you just wanna be
I always thought this would
Come oh so naturally

I'm gonna do just what you order me to do
So chase me, chase me,
I'll run twelve circles around you
I'll make this way worse than you know

Ain't it a shame that they won't
remember all of this

Let's get, let's get it going
Make a mess way worse than you know
We'll beat this town black and blue
With my quick and easy flow

They will ask us where we came from
Where's the place that we blew in from
I wanna make them like us
I wanna make them worship us
It'll make you feel like you're in love

Ain't it a shame that they won't
remember all of this
We're all just faking out with someone
Who tells us what we should miss

More fakes than you have ever been
More fakes than you have ever...
Spin spin the truth gets a chance

Ain't it a shame that they won't
remember all of this
We're all just faking out with someone
Who tells us what we should miss

Ain't it a shame that they won't
remember all of this
We're all just faking out with someone
Who tells us what we should miss

Don't tell me what to miss
Don't tell me what...
