

Tonight

The Answer

Today's the day we're gonna leave all our problems
Just get up and go
So forget them, you don't need them
Leave it alone

When the good mornings are long
I can never go wrong
There's a storm coming our way
But not today

Tonight's the night you can make it
Tonight's the night you can make it
Tonight's the night you can make it
So alright with me.

You asked for silver and I gave you gold
I'm asking nothing from you
If these people had a clue what we knew
They'd be feeling it too

The time's passing us by
But I've never risen so high
The day is moving so fast
So we got to make it last
Make it last

Tonight's the night you can make it
(ooh la la la la na na na na)
Tonight's the night you can make it
(ooh la la la la na na na na)
Tonight's the night you can make it
Tonight's the night you can make it
Tonight's the night you can make it
Tonight's the night you can make it
You can make it all right
You are alright with me
