

Too Far Gone

The Answer

You don't know, you can't know just who I am
You don't know, you can't know just who I am

You say you gotta name and a number
Well, we're gonna find you anyway
Communications lost throughout the land
Oh, you offer me your guilty hand

Because you're too far gone with the money you've spent
Take a stab at a war, you work for the government
Too far gone, you're too far gone, I say you're too far gone
But you keep pushing harder and harder

Think you got a vote from the people
Now you've gotta fight for your right to stay, yeah you do
Disillusion can't connect the world
I can't believe in your fucking law no more

Because you're too far gone with the money you've spent
Take a stab at a war, you're working for the government
Too far gone, you're too far gone, I say you're too far gone
But you keep pushing harder and harder

You take the free from the people, I guess you got the human disease
You stand tall you look strong but you're taking the free out of me
Yeah, out of me and it's not exactly hard to see

You don't know, you can't know just who I am
You don't know, you can't know just who I am

You're too far gone, you're too far gone, I say you're too far gone
But you keep pushing harder and harder, yeah
