

1000 Years from Today

The Beloved

Today I woke up smiling
In a misty morning mood
Watched your face as you were sleeping
I felt sure you understood

Well, you know, you know how I love you so
More than ever now with each single day
And you know that I'll still be loving you
1000 years from today

Hey, got that deeper kind of feeling
That a younger me kept pushing aside
Let me be for you all that I'm longing to
Right by your side

Well, you know, you know how I love you so
More than ever now with each single day
And you know that I'll still be loving you
1000 years from today

Yes, you know a lifetime to be with you
Seems so little now yet so far away
But you know that I'll still be loving you
1000 years from today, yeah

All of my longing and all my belonging
All I can give you, all my life with you

Oh, well you know, you know how I love you so
More than ever now with each single day
And you know that I'll still be loving you
1000 years from today

Yes, you know a lifetime to be with you
Seems so little now yet so far away
Oh, but you know that I'll still be loving you
1000 years from today, yeah

Yes you know, yeah you know how I love you so
More than ever now with each single day
Oh, but you know that I'll still be loving you
1000 years from today
