The Way

The Butterfly Effect

Close your eyes so you can't see As you climb down with me Take my hand don't walk alone Where it stops I don't know

It's all right with me
Saviour insult

Those who suffer Those who care Those who linger Anywhere at all

Take a minute Discover Why you need No other

It's all right with me
Don't be selfish

Those who suffered Those who cared Those lingered Anywhere at all

That's how it is
That's how it used to be
No one waiting there for me
That's how it is
That's how we used to be
That's how it was and always will be

The way we were
That's how we used to be
How it was and always will be
