Song For The Day

The Cat Empire

These nights awake
Can you imagine how much time
We've spent around here?

Enough to say that we have seen
Two moons come past
Pass and turn away

Don't close your eyes
– For we
Have come to love
Tat mad white glare

Don't close your eyes for we
Would see the room depart
And sing the song for day

Singing the song
Singing the song just for the day
Singing the song
While the moons they fade away

The song that brings the night to sleep
And creeps into our eyes
For delusion makes them manic –
For delusion makes us manic
For illusion makes us sing

The song just for the day
