Been Training Dogs

The Cooper Temple Clause

Been training dogs again To bite your little princess And making sure they make a scene Running errands all the way Communicate in codes You've just gotta make the in-roads

Holding on - to what you've got Making plans - just to stay alive Doing time - oh you bet you will I'm doing mine - by the side of the road Making out - cos i'm making good What it's all about - like i said i would Then you realise - well, look who's laughing now

We take pride in our work The key's the execution And, hey that's what we had in mind But we're not just having fun I wouldn't wanna be ya Cos we're drawing blood if we see ya

And we're not afraid to use animals Or anything else that'll tear itself a hole Yeah we'll be just like dumb fucking animals If that's the kind of game you wanna play
