

# The Operator

## The Coral

The operators came and took me away  
They took me away  
Everybody laughed  
Remember the day they took me away

I don't know what they're looking for  
Don't think I'll ever know

They laid me on the bed  
Drilled my head  
The incision bled  
Put wires in my brain  
Every now and again  
I remember a name

And as I drift away  
Into my hiding place

A maze of alleyways  
Where the cameras cannot see

The operators came and took me away  
They took me away  
Everybody laughed  
Remember the day they took me away  
Remember the day they took me away  
Remember the day they took me away
