

# Dance the Night

The Cult

My demons swept me away  
To the arms of evening, I's feeling crass today  
From the stars, you came to me  
Lit up, like some alien queen

Dance the night  
Dance the night  
With light feet  
Dance the night  
On the boulevard

Into these lesser, these lesser lights  
Feel like somebody, feel like somebody tonight  
Face the mirror, take the strain  
When she kissed me, sweet Elektra in flames, in flames

Dance the night  
Dance the night  
With light feet  
Dance the night  
On the boulevard  
Repel the ghosts, ignite the fates  
Steal their gaze, won't hesitate  
Dance the night  
With light feet  
Dance the night

Dance the night  
Dance the night  
With light feet  
Dance the night  
On the boulevard  
Repel the ghosts, ignite the fates  
Steal their gaze, won't hesitate  
Dance the night  
With light feet  
Dance the night

My demons are praying  
The evening is swaying  
My demons are praying  
The evening is swaying
